Insulin Passport for

EMERGENCY INFORMATION CARD

I have Type.....diabetes and inject insulin. If I am ill or fainting my usual 'hypo' treatment is.....

Please give it to me unless I am unable to cooperate or unconscious.

- If I have not recovered after 10 minutes please repeat the treatment.
- If I am unconscious/ unable to cooperate do not give me anything by mouth.
- Call 999 for an ambulance immediately.

Instructions

Keep it with you for emergencies and for reference when insulin products are prescribed or dispensed.

In the table below you should record information of your current insulin products. Provide as much detail so that your insulin is clearly identified. A healthcare professional can help you with this. If someone else has added information, ask them to sign it. You must keep this information up to date. Keep the passport with you and when you need to contact a healthcare professional, show it to them. They can use the information to help identify exactly what insulin products you use.
